Re: In the Matter of Kansas Gas and Electric  
Company, et al. (Wolf Creek Generating  
Station, Unit No. 1) Docket No. STN 50-482

Gentlemen:

Enclosed is the Joint Stipulation on Waverly Contention  
executed by counsel for Intervenor, Applicants, NRC Staff  
and FEMA.

As indicated during the February 3 conference call, the  
Joint Stipulation obviates the February 8 filing of any written  
direct testimony called for by the Licensing Board's January 5,  
1984 Memorandum and Order (Granting Intervenor's Motion to  
Add Contention and Witnesses).

Very truly yours,

JAY E. SILBERG  
Counsel for Applicants

Docket No. STN 80-482

JOINT STIPULATION ON  
WAVERLY CONTENTION

On January 5, 1984, the Atomic Safety and Licensing Board admitted a late-filed contention of intervenors Christy and Salava concerning the inclusion of the Town of Waverly and the Waverly schools in the plume exposure pathway emergency planning zone ("EPZ"). As a result of discussions between Applicants and intervenors, the parties have reached the following agreement:

1. The plume exposure pathway EPZ as described in the September 1983 revision of the Coffey County Contingency Plan for Incidents Involving Commercial Nuclear Power (the "existing plume exposure pathway EPZ") will be expanded to include the Town of Waverly and the Unified School District No. 243 schools located in Waverly. Such expansion will be shown in the Coffey County Contingency Plan;

2. Intervenors withdraw the contention admitted by the Licensing Board's January 5, 1984 Memorandum and Order and agree that their remaining contentions are not to be interpreted to raise, and that intervenors will not challenge, the availability or adequacy of resources and personnel to provide for emergency response activities (including all activities identified in intervenors' remaining contentions) with respect to Waverly;

8402090144

3. Intervenors do not withdraw any of the remaining contentions as they apply to the existing plume exposure pathway EPZ;

4. Intervenors may continue to contest emergency response activities with respect to the existing plume exposure pathway EPZ, provided that Intervenors' remaining contentions are not to be interpreted to raise, and Intervenors will not challenge, the effect that including Waverly in the plume exposure pathway EPZ will have on those activities;

5. Commercial grade tone alert radios will be furnished to the Unified School District No. 243 schools located in Waverly;

6. The Coffey County Contingency Plan will be revised to provide that students at the Unified School District No. 243 schools located in Waverly will be evacuated to a host county registration center designated in the Plan;

7. An outdoor warning siren for Waverly will be installed as described in Wyle Research Report WR 82-36 (June 1983). This will be provided in the Coffey County Contingency Plan;

8. Public information materials (i.e., brochures and telephone books) will be furnished to Waverly households in the same manner as for households within the existing plume exposure pathway EPZ;

9. Evacuation route(s) for Waverly will be established in the Coffey County Contingency Plan in the same manner as for the existing plume exposure pathway EPZ;

10. A list of those individuals in Waverly needing special notification will be established and maintained in the same manner as for the existing plume exposure pathway, and these individuals will receive special notification within the same 45 minute period provided for such individuals within the existing plume exposure pathway EP2. The Coffey County Contingency Plan will identify by title the person responsible for performing such notification;

11. Applicants will reevaluate the evacuation time estimate for special populations to include special populations within Waverly. If the estimate indicates that evacuation of special populations within Waverly would take more than 2.5 hours, the estimated evacuation time for special populations set forth in the Coffey County Contingency Plan will be revised accordingly;

12. The Coffey County Contingency Plan will be revised to provide for special transportation to those individuals in Waverly who require it; and

13. The Coffey County Contingency Plan will be revised to provide the evacuation confirmation time parameters for Waverly consistent with the 10.5 hour time shown for the existing plume

exposure pathway EPZ. (The evacuation confirmation time parameters represent a technique to estimate overall confirmation times, rather than a planned allocation of resources, and therefore the estimated confirmation times for specific locations within the plume exposure pathway EPZ do not necessarily reflect the time within which confirmation will be completed for those specific locations.)
