Mr. Henry Bailey
Trends and Patterns Analysis Branch
Office for Analysis and Evaluation
of Operational Data, MS-5217 MNBB
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Bailey:

Draft Report on Diagnostic Review of South Texas Units 1 and 2

Enclosed is the draft report of our review of LERs for South Texas Units 1 and 2 to support you in preparing for your visit to the site the week of March 8. This report is consistent with your work authorization sent March 1.

We are also enclosing a Word Perfect format file of the information in this report in case you find it necessary to reformat certain elements of the report for clarity, etc. We would appreciate it if you would inform us of any changes you make to the document so that we keep our records accurate and up to date.

At this time (Friday) we are still reviewing certain areas of plant performance and may augment certain sections of the report. We may update the information in this report via facsimile on Monday.

Although I will be on travel to AEOD offices from Monday afternoon through Wednesday evening, we will have staff here to answer any questions you have about the report.

Sincerely yours,

W. P. (Mike) Poore
Nuclear Operations Analysis Center
