(b) North Atlantic Letter NYN-94120, dated October 17, 1994, "Request for Exemption from Certain Requirements of 10CFR73.55, "Requirements for Physical Protection of Licensed Activities in Nuclear Power Plant Reactors Against Radiological Sabotage" (TAC No. M90560)" T.C. Feigenbaum to USNRC

Subject: Response to Requests for Additional Information

Gentlemen:

North Atlantic Energy Service Corporation (North Atlantic) submitted on October 17, 1994, [Reference (b)] a request for exemption from certain requirements of 10CFR73.55 to permit the implementation of an alternative access control system at Seabrook Station. The biometrics access control system, will eliminate the need to issue and retrieve badges at the protected area entrance and exit locations and will allow all individuals; including licensee employees, contractors, NRC employees and others, with unescorted access, to retain their badges when departing the protected area.

North Atlantic has enclosed responses to NRC requests for additional information related to the biometrics access control system. The enclosure reiterates the NRC questions and provides responses in the form of draft revisions to the Seabrook Station Physical Security Plan and Safeguards Contingency Plan.

The enclosure to this letter contains safeguards information and should be withheld from public disclosure in accordance with 10 CFR 73.21. This cover letter does not contain Safeguards Information and reverts to unclassified when separated from the enclosure.

Should you have any further questions regarding the request for exemption or the enclosed material please contact Mr. James M. Peschel, Regulatory Compliance Manager, at (603) 474-9521 extension 3772.

Very truly yours,

Ted C. Feigenbaum
