File: X7BG03-M34  
Log: GN-314

Reference: Vogtle Electric Generating Plant - Units 1 and 2,  
50-424, 50-425; Main Feedwater Pipe Supports - Unverified  
Computer Code, GN-242 dated July 14, 1983

Attention: Mr. James P. O'Reilly

Gentlemen:

In our previous correspondence on this issue, Georgia Power Company indicated that the final report could be expected by February 3, 1984. The previous letter also indicated that new input data for the computer program could be expected from Anchor Darling Valve Co. in 12 to 16 weeks. In reality, it took over 20 weeks to obtain the input data. Therefore, Georgia Power Company now expects this issue to be resolved on or before March 9, 1984.

This response contains no proprietary information and may be placed in the NRC Public Document Room upon receipt.

Yours truly,

D. O. Foster
