Re: Catawba Nuclear Station
Units 1 and 2
Docket Nos. 50-413 and 50-414

Dear Mr. O'Reilly:

In my letter of October 13, 1984 transmitting Significant Deficiency Report No. 413-414/83-12, it was stated that the damaged 1B diesel generator stator would be returned to the manufacturer for a complete rebuild and used in lieu of the 2A stator. The committed completion date for this action, which applies to Unit 2 only, was June 1, 1984. The rebuilt stator will not be returned to the Catawba site until June 1, 1984, so that the full completion of this action will not take place until September 1, 1984.

The final report on the metal files' origin will be forthcoming as committed by June 1, 1984.

Very truly yours,

Hal B. Tucker
