Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Ms. E. G. Adensam, Chief
Licensing Branch No. 4

Subject: Duke Power Company
McGuire Nuclear Station
Docket Nos. 50-369 and 50-370

Dear Sir:

Please find attached five copies of Revision 2 to the Duke Power Company Response to Supplement 1 to NUREG-0737 for McGuire Nuclear Station. This document was originally submitted as an enclosure to my letter of April 14, 1983.

The attachment includes the Duke Control Room Review Final Report and the McGuire Units 1 and 2 Control Room Review Supplemental Report. The contents of these two reports comprise the control room review summary report for McGuire Units 1 and 2 as required by paragraph 5.2b of Supplement 1 to NUREG-0737.

This revision does not include the implementation schedule for control room modifications resulting from the completed McGuire Control Room Review. The implementation schedule is currently under development and will be contained in a subsequent revision to be submitted in accordance with the original commitment date made in the April 14, 1983 Duke response.

Instructions for inserting Revision 2 into the McGuire document are included as part of the attachment.

Very truly yours,

H.B. Tucker /-ABU

Hal B. Tucker
