Re: In the Matter of Commonwealth Edison Company
(Byron Nuclear Power Station, Units 1 and 2)
Docket Nos. 50-454 and 50-455

Gentlemen:

Please find enclosed "Applicant's Additional Proposed Findings of Fact and Conclusions of Law Regarding Quality Assurance and Quality Control."

Please note that this document should be incorporated with the proposed findings previously filed by the Applicant. Thus, the Opinion and Findings sections in the enclosed document pick up the sequential enumeration from the prior documents. Finding 737 was the last proposed finding in Applicant's August 9, 1983, filing, and contained proposed ultimate Board findings on the quality assurance issue. Finding 737 should be considered as based also upon the proposed findings and conclusions today submitted.

Very truly yours,

Mark C. Furse
Mark C. Furse

One of the attorneys for
Commonwealth Edison Company
