BRUNSWICK STEAM ELECTRIC PLANT, UNIT NOS. 1 AND 2
DOCKET NOS. 50-325 AND 50-324
LICENSE NOS. DPR-71 AND DPR-62
WITHDRAWAL OF REQUESTS FOR LICENSE AMENDMENTS

Dear Mr. Vassallo:

On August 31, 1982, Carolina Power & Light Company (CP&L) submitted a license amendment request concerning electrical power systems for the Brunswick Steam Electric Plant, Unit Nos. 1 and 2. Specifically, the requested revision related to Action Statement outage times for inoperable diesel generators (D/Gs), the frequency of D/G "quick starts," and the deletion of Technical Specification (TS) 4.8.1.1.1.b. Based on our discussions with members of your staff concerning this request, CP&L hereby withdraws the August 31, 1982 request referenced above.

By letter dated September 29, 1983, CP&L submitted proposed TS revisions concerning Limiting Conditions for Operation and Surveillance Requirements for the feedwater/main turbine trip actuation instrumentation and main turbine bypass systems. Although this submittal was made at the request of the Staff, CP&L requested that issuance of the proposed changes be withheld until the NRC Staff could determine whether the subject should be treated as a generic issue. In a letter dated January 19, 1984, you stated your conclusion that the issue should be treated as a generic issue and, based on a preliminary analysis, that Brunswick-1 and Brunswick-2 could continue to operate safely without the proposed TS requirements until the generic issue is resolved. Therefore, based on your conclusion that implementation of any proposed TS is not necessary at this time and in order to reduce the number of inactive pending license amendment requests on the Brunswick docket, CP&L also hereby withdraws the September 29, 1983 license amendment request.

Should you have any questions concerning these matters, please contact our Licensing Staff.

Yours very truly,

P. W. Howe
Vice President
Brunswick Nuclear Project
