

KANSAS GAS AND ELECTRIC COMPANY

GLENN L. KOESTER  
VICE PRESIDENT - NUCLEAR

October 7, 1983

Mr. W.C. Seidle, Chief  
Reactor Projects Branch 2  
U.S. Nuclear Regulatory Commission  
Region IV  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

KMLNRC 83-131

Re: Docket No. STN 50-482

Ref: Interim Report KMLNRC 83-029 dated 3/21/83 from  
GLKoester, KG&E, to WCSeidle, NRC

Subj: Withdrawal of Potential 10CFR50.55(e) Report -  
Hanger Notes and Symbols

Dear Mr. Seidle:

On February 21, 1983, Kansas Gas and Electric Company (KG&E) reported a potential 10CFR50.55(e) item concerning changes to the hanger notes and symbol drawings for Wolf Creek Generating Station, and additional information was subsequently provided in the Reference. The Reference also stated that an updated status would be submitted by September 19, 1983. However, KG&E was nearing completion of the evaluation on that date and requested an extension so that a final report could be submitted rather than an interim report. Mr. Otto Maynard of my staff discussed this matter with you on September 19, 1983, and an agreement was reached for extending KG&E's report due date to October 7, 1983.

The Architect/Engineer has completed the evaluation of this matter and has determined that the four concerns, identified in the Reference, if left uncorrected, would not have adversely affected safety of operations. Therefore, Kansas Gas and Electric Company has concluded that this matter is not reportable pursuant to 10CFR50.55(e).

Please contact me or Mr. Otto Maynard of my staff if you have any questions concerning this subject.

Yours very truly,

*Glenn L. Koester*
