Standardization Project Directorate

Subject: GE PANDA Audit Report (Non Proprietary)

Transmitted herewith is a copy of the Non Proprietary version of GE Audit Report No. ARP 95-2, Quality Assurance Audit of the SBWR PANDA Test Program by Services & Projects Quality, dated February 2, 1995, as requested by NRC staff. This audit examined the adequacy, implementation and resulting documentation of the GE PANDA Project Quality Control Plan at the PANDA test facility of the Paul Sherrer Institute (PSI) at Wuerenlingen, Switzerland. This plan and supporting procedures were prepared and provided by GE Nuclear Energy (GE-NE) and accepted by PSI to implement the requirements of the SBWR Design and Certification Program Quality Assurance Plan. The readiness of the PANDA test facility to perform tests was also examined. The applicable requirements of NQA-1 were addressed. The Report requires appropriate disposition of open items and recommendations prior to the initiation of testing at PANDA.

Sincerely,

James E. Quinn, Projects Manager
LMR and SBWR Programs
