- (7) Serial 23808, dated September 30, 1983

This letter provides another interim 10CFR50.55(e) report concerning the B&W steam generator auxiliary feedwater headers.

Field change authorizations and associated design documents have been approved and issued for the Unit 2 steam generators. OTSG-2A risers presently are being stress relieved. Steam generator 2B welding, fitup and stress relieving as well as flow nozzle and piping installation for both 2A and 2B has been forecast for completion by January 15, 1984 for both steam generators.

Due to the delay of Unit 1 startup dates, all work on the Unit 1 auxiliary feedwater headers has stopped. No schedule has been established for design change and modification of hardware.
