REGION VICE

Mr. J. B. Martin, Administrator  
United States Nuclear Regulatory Commission  
1450 Maria Lane, Suite 260  
Walnut Creek, California 94596

Subject: NUCLEAR PROJECTS 3 AND 5  
DOCKET NUMBERS 50-508 AND 50-509  
IE BULLETIN 83-06

The subject IE Bulletin requested that holders of construction permits submit a report describing the actions taken or planned regarding materials used in safety-related systems which were supplied by Tube Line Corporation. It was requested that the report be submitted within 120 days of the date of the Bulletin.

An investigation is still in progress. We have confirmed that Tube Line products have been supplied for use in WNP-3 components. We have yet to determine their use in safety-related applications. Due to the extended construction delay, the Supply System report describing actions/plans for WNP-3 and WNP-5 regarding the items in the subject Bulletin will be submitted to you by June 30, 1984.

If you should have any questions on this information, please contact me.

A. D. Kohler (760)  
Program Director, WNP-3
