Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of) Docket Nos. 50-327
Tennessee Valley Authority) 50-328

On November 17, 1982, TVA submitted proposed technical specification (T/S) changes for an additional level of over/undervoltage protection at the Sequoyah Nuclear Plant units 1 and 2. These proposed T/S changes were to satisfy part of the requirements of the unit 1 license condition, 2.C.(18).c and unit 2 license condition 2.C.(11).b. NRC subsequently approved the T/S changes for each unit by issuance of Amendment 29 to the operating license, DPR-77, for unit 1 and Amendment 18 to the operating license, DPR-79, for unit 2. The modifications associated with the license conditions have been completed. Therefore, we consider these license conditions 2.C.(18).c for unit 1 and 2.C.(11).b for unit 2 to be satisfied.

If you have any questions concerning this matter, please get in touch with J. W. Wills at FTS 858-2685.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
