SENIOR VICE PRESIDENT
NUCLEAR OPERATIONS

Docket No. 50-358

U.S. Nuclear Regulatory Commission
Region III
799 Roosevelt Road
Glen Ellyn, Illinois 60137

Attention: Mr. J.G. Keppler
Regional Administrator

Gentlemen:

RE: WM. H. ZIMMER NUCLEAR POWER STATION - UNIT 1
10CFR50.55(e), ITEM M-54, INADEQUATE QUALIFICATION
OF HYDRAULIC CONTROL UNITS (HCU'S)
W.O. 57300, JOB E-5590, FILE NO. 956C, M-54

This letter constitutes an interim report concerning the subject reportable condition reported to the Commission on July 26, 1982 under 10CFR50.55(e). Our previous report, LOZ-83-0071, was submitted June 28, 1983.

The analysis of the proposed modifications to the HCU supports is in process. Upon satisfactory completion of this analysis, limited scope operability testing will be performed. An Engineering Change Request (ECR) will then incorporate the subject modifications into design documents for construction scheduling and completion in accordance with the Continuation of Construction Plan (CCP) as outlined in CG&E's Course of Action transmitted to the Commission on October 5, 1983. We will notify the Commission upon completion of the above activities for close-out review.

We trust the above will be found acceptable as an interim report under 10CFR50.55(e).

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY
