December 2, 1983

Darrell G. Eisenhut, Director  
Division of Licensing  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Sir:

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
Emergency Response Capabilities  
Supplement 1 to NUREG 0737

Reference: Letter, P.B. Fiedler to D.G. Eisenhut,  
dated April 15, 1983

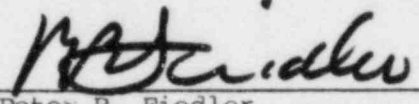

The purpose of this letter is to report a change in the submittal date of one of the items contained in the reference submittal. The specific item is the Safety Parameters Display System (SPDS)/Plant Computer Systems (PCS) safety analysis, which is due to be submitted to the Commission by November 30, 1983. The new submittal date for this safety analysis is December 31, 1983.

This new date is necessary because the selection and documentation of the specific parameters to be included in the SPDS/PCS took somewhat longer than originally forecasted. After an internal review period, the submittal will be made at the end of December.

Should you have any questions concerning this matter, please contact me or Mr. Michael Laggart, Oyster Creek Licensing Manager at (609)971-4643.

Very truly yours,

8312090051 831202  
PDR ADOCK 05000219
