In The Matter of
PHILADELPHIA ELECTRIC COMPANY
(Limerick Generating Station
Units 1 and 2)

Docket Nos. 50-352
50-353

AWPP's Fifth Request For Information re Contention VI-1

How many non-conformance reports relate to safety related welding infractions at Limerick?

Provide individual copies of ^{those} those reports.

Provide documentation on how individual NCR's were dispositioned.

Re attachment 1 in July 3, 1980 letter from P.E.'s John S. Kemper to Mr. Boyce Grier, re USNRC IE Region 1 letter dated June 4, 1980 re 50-352-353-80-02 involving obsolete drawings (C-1182 Revision 5 and C-1183 Revision 10) how much work was done using those obsolete drawings? Show all inspection reports of work performed using those obsolete drawings, with sworn statement that all inspections were made and status of deficiencies found.

Re IE Notice 82-34 re "welds in Main Control Panels", has the Applicant received a report on the NRC Staff review of I E Notice 82-34 ? If so please provide copy.

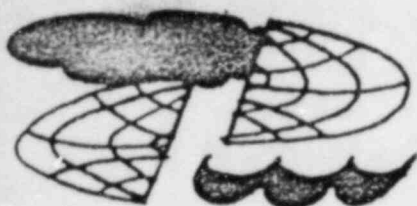

Respectfully submitted,
AIR & WATER POLLUTION PATROL

Frank R. Romano

BROAD AXE, PA.

Dec. 7, 1983

U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

BEFORE THE ATOMIC SAFETY & LICENSING BOARD

In The Matter Of
PHILADELPHIA ELECTRIC COMPANY
(Limerick Generating Station
Units 1 and 2)

Docket Nos. 50-352
and 50-353

QUALIFICATIONS OF FRANK R. ROMANO FOR AWPP TESTIMONY inadvertently not included with cross examination plan.

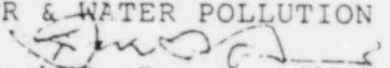

I have a Bachelor and Master's degree from Penn State University in Chemistry and related subjects including college level physics courses. I have been chemist for the U.S. Government with papers published on the effect of weather (temperature and moisture) on military gear in the South Pacific.

I have been Director of Ambler Laboratories for over 25 years doing science analyses in chemistry and development of tests involving atmosphere pressure, elevation above sea level, as it relates to sample volumes in precise work.

I have been doing studies concerned with acid rain, in particular to check for effects of atmospheric contaminants as may be carried by air currents from distant sources. This work involved modification of sampling using an airplane.

Fundamentally for Contention V-4 I have adequate knowledge and understanding of the principles involved.

Respectfully submitted,
AIR & WATER POLLUTION PATROL
