Docket No. 50-334, License No. DPR-66
Semiannual Effluent Report For The First Six Months Of 1983: Amendment To

Gentlemen:

The attached five tables are being resubmitted to you as a result of the completion of the strontium composite analysis. The following is a summary of the report revisions due to the addition of the strontium analysis results.

TABLE 1A - Data was added to items C.1 and C.2 for the first and second quarters of 1983.

TABLES 1B and 1C - Data was added to item 3 (strontium - 89 and strontium - 90 for the continuous mode columns) for the first and second quarters of 1983.

TABLE 2A - Data was added to items A.1, A.2 and A.3 for the second quarter of 1983.

TABLE 2B - Data was added to the batch mode column for the second quarter of 1983.

We also wish to point out that the original report which was sent to you on August 19, 1983 included an erroneous note on TABLE 1A. The note stated, "The total curies of tritium released for the first and second quarters include average values. These are due to the loss of five samples from gaseous waste discharge for the first and second quarters." After submittal of the original report, the results for the five tritium samples were recovered. Subsequent recalculation of the tritium totals indicated no change in the data previously
