RICHMOND, VIRGINIA 23261

W. L. STEWART
VICE PRESIDENT
NUCLEAR OPERATIONS

December 15, 1983

Mr. Harold R. Denton Director
Office of Nuclear Reactor Regulation
Attn: Mr. James R. Miller, Chief
Operating Reactors Branch No. 3
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Serial No. 707
NO/JHL:ah
Docket Nos. 50-338
50-339
License Nos. NPF-4
NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNIT NOS. 1 AND 2
PROPOSED TECHNICAL SPECIFICATION CHANGES

Pursuant to 10 CFR 50.90, the Virginia Electric and Power Company requests an amendment in the form of changes to the Technical Specifications, for Operating License Nos. NPF-4 and NPF-7 for North Anna Unit Nos. 1 and 2.

The proposed changes will revise Technical Specification 3.0.3 to partially state, "In the event a Limiting Condition for Operation and/or associated ACTION requirements cannot be satisfied because of circumstances in excess of those addressed in the Specification, within one hour ACTION shall be initiated to place the unit in a MODE in which the Specification does not apply by placing it, as applicable, in:

1. At least HOT STANDBY within 6 hours;
2. At least HOT SHUTDOWN within the next 6 hours; and
3. At least COLD SHUTDOWN within the following 24 hours."

In addition, the Technical Specification Bases has been revised to provide consistency with the changes to Technical Specification 3.0.3.

These proposed changes are needed to provide consistency in relation to the time requirements of the Standard Technical Specifications for Westinghouse PWR's, Revision 4 issued Summer, 1980. The proposed Technical Specification changes for North Anna Unit No. 1 are provided in Attachment 1. The proposed Technical Specification changes for North Anna Unit No. 2 are provided in Attachment 2. A discussion of the proposed Technical Specification changes is provided in Attachment 3.

Rec'd w/check #4,400

VIRGINIA ELECTRIC AND POWER COMPANY TO Harold R. Denton

This request has been reviewed and approved by the Station Nuclear Safety and Operating Committee and the Safety Evaluation and Control Staff. It has been determined that this request does not pose an unreviewed safety question as defined in 10 CFR 50.59 and these changes do not pose a significant hazards consideration as defined in 10 CFR 50.92.

We have reviewed this request in accordance with the criteria in 10 CFR 170.22. Since this request involves a safety issue which the Staff should be able to determine does not involve a significant hazards consideration for Unit 1 and a duplicate safety issue for Unit 2, a Class III license amendment fee and a Class I license amendment fee are required for Unit 1 and Unit 2 respectively. A voucher check in the amount of \$4,400 is enclosed in payment of the required fees.

Very truly yours,

W. L. Stewart
