BEC0 83-294

Mr. William O. Miller, Chief
License Fee Management Branch
Office of Administration
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

License No. DPR-35
Docket No. 50-293

Reference: (a) NRC Letter (W.O. Miller) to Boston Edison Company (A. V. Morisi), dated, September 20, 1983.

Dear Sir:

On December 3, 1982, Boston Edison Company submitted the Second Ten Year Inspection Program for the Pilgrim Nuclear Power Station. Subsequently, in Reference (a) you assessed us \$4,000 based on a preliminary review of the program by the ONRR staff.

Pursuant to 10 CFR 55a, Technical Specification changes are required as part of this program. We believe that it is because of the Technical Specification requirements that fees should be assessed and it is our intention to remit this fee coincident with our Technical Specification submittal on this subject. These changes will be submitted to NRC on March 15, 1984.

Should you have any questions, please contact us.

Very truly yours,

WD Harrington
