December 19, 1983

NUCLEAR PRODUCTION DEPARTMENT

U. S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Washington, D. C. 20555

Attention: Mr. Harold R. Denton, Director

Dear Mr. Denton:

SUBJECT: Grand Gulf Nuclear Station
Units 1 and 2
Docket Nos. 50-416 and 50-417
License No. NPF-13
File: 0260/765
Response to GGNS-2 Staffing Survey
AECM-83/0803

Mississippi Power & Light Company (MP&L) is providing this letter in response to an informal survey being conducted by the NRC Staff pertaining to the profile of the plant staff. The survey requests information about Grand Gulf Nuclear Station, Unit 2 (GGNS-2).

Since GGNS-2 is under construction and no licensing action is expected to occur for several years, MP&L's position is that estimates pertaining to staffing provided at this time would not be meaningful. MP&L's position was discussed with the GGNS NRC Project Manager on December 16, 1983.

The NRC Staff has indicated a similar survey for GGNS Unit 1 will be formally issued to MP&L in the near future. Information pertaining to the organization, staffing levels, and experience associated with the operation of Grand Gulf Unit 1 was provided to you in the MP&L letter, AECM-83/0680, dated October 26, 1983. This information was also discussed with the NRC Staff in a meeting held on October 28, 1983. As discussed with the NRC Project Manager on December 16, 1983, MP&L is prepared to provide additional information on staffing levels and experience for GGNS-1, if required. Please contact this office if further information is desired.

Yours truly,

L. E. Dale
Manager of Nuclear Services
