SUBJECT: Arkansas Nuclear One - Unit 2  
Docket No. 50-368  
License No. NPF-6  
Proposed Technical Specification  
Change Request - Electrical Power  
Systems

Gentlemen:

Attached is a proposed change to the Arkansas Nuclear One - Unit 2 Technical Specification 3.8.2.3 and corresponding Surveillance Requirements for your review and approval. This change proposes to adopt Standard Technical Specification 3.8.2.1 and corresponding Surveillance Requirements presented in NUREG-0452, Revision 4.

In accordance with 10CFR50.92(c), we have determined the proposed amendment as having No Significant Hazards Considerations (NSHC), and to satisfy the Sholly provisions, we are including the basis of our NSHC determination as part of this request submittal. A copy of this submittal has been sent to Mr. E. Frank Wilson, Director, Division of Environmental Health Protection, State Department of Health.

While the characteristics and effects of this proposed amendment are not exigent or emergency, expeditious processing is requested, since failure to do so could result in future plant shutdown. We have assigned this item a very high priority and are available for assistance as necessary.
