Reporter and Notary Public.

BROWN REPORTING, INC.
1100 SPRING STREET, SUITE 750
ATLANTA, GEORGIA 30309
(404) 876-8979

1 MOSBAUGH: Bill, what can I do for you?

2 SHIPMAN: We are trying to, as you know,
3 to get these two LER's out (inaudible) the LER on the
event. I understand

4 from Jack that we are using an LER as a report of a
5 valid diesel generator failure as well as LER.

6 MOSBAUGH: That's right, the LER on the
7 50.73 reportability requirements.

8 SHIPMAN: Right. To do that, the report
9 requires us to submit the number of diesel generator
10 tests, valid tests in the last 100 tests.

11 MOSBAUGH: Right. There is a statement
12 to that effect in the Corrective Action section.

13 SHIPMAN: The problem that Jack [Stringfellow]
has is
14 that we don't have any records in the diesel
15 generator log of the tests that were conducted after
16 the 13th of March.

17 MOSBAUGH: I think there were so many
18 starts and tests and all that that I know the one log
19 that we track that with down here has not had time
20 to catch up yet, but there are records of all the
21 starts and they're tabulated in a couple of different
22 places.

23 SHIPMAN: But they are not included in
24 this LER.

25 MOSBAUGH: I think that's true, but I

1 think they were going to get a look at that, or when the
2 PRB reviewed that, that was a PRB comment.

3 SHIPMAN: The information Jack has got
4 was that we can't get that, you know, we are not
5 going to have that, and I don't really see how we
6 are going to meet our reporting requirement unless
7 we have that information in this LER, do you?

8 MOSBAUGH: Well, the only issue would be,
9 it obviously needs to be contained in the LER. But
10 the only question would be up to what date and
11 effective what date.

12 SHIPMAN: But we are reporting a failure
13 on the 20th. So --

14 MOSBAUGH: Right. It certainly needs to
15 be up through then.

16 SHIPMAN: All right. I think if we can
17 just say through the 20th --

18 MOSBAUGH: Through the 20th, that's no
19 problem at all.

20 SHIPMAN: Apparently it is from somebody,
21 and that's why I called you for some help.

22 MOSBAUGH: I don't think that's a problem
23 at all. Let me find out why that's a problem for
24 anybody. I think it becomes more difficult to make
25 statements, you know, up to today.

1 SHIPMAN: Right. I understand. What we
2 can do, you know, on the LER is, we can say through
3 the 20th.

4 MOSBAUGH: I see where that should be no
5 difficulty at all.

SHIPMAN: Would you see. . .

MOSBAUGH: I will get that fixed, and I
6 will have Aufdenkampe call information or
7 confirmation back to Stringfellow.

8 SHIPMAN: Great. I appreciate it Allen.

9 MOSBAUGH: Okay.

10 SHIPMAN: Bye.

11 MOSBAUGH: Bye.
