OFFICE ADDRESS:
2500 RAYBURN HOUSE OFFICE BUILDING
WASHINGTON, D.C.

Congress of the United States
House of Representatives
Washington, D.C. 20515

November 9, 1970

Dr. Glenn T. Seaborg
Chairman
United States Atomic Energy Commission
Washington, D. C. 20545

Dear Dr. Seaborg:

The Lockheed-Georgia Company is suspending operations of its Dawsonville, Georgia Nuclear Laboratory and, under date of August 14, 1970, it requested your Division of Reactor Licensing to authorize the company to amend its Facility License R-86 to own but not operate the Radiation Effects Reactor there. It is my understanding that the reactor is actually unloaded and disassembled.

I express the hope this request can be expeditiously processed and approved. Please advise me in the premises.

Thank you.

Sincerely yours,

Phil M. Andrum
