Seaford, Delaware 19973

SUBJECT: NANTICOKE MEMORIAL HOSPITAL, CONSENT TO PROPOSED TRANSFER,  
MAIL CONTROL NO. 617317

Dear Mr. Rose:

By the letter dated December 16, 2019, Nanticoke Memorial Hospital (NMH) requested written consent by the U.S. Nuclear Regulatory Commission (NRC) to a proposed indirect transfer of control of NRC Materials License No. 07-17618-01 where Peninsula Regional Health Services (PRHS) became the sole corporate member of NMH. Based on the information you provided, we understand that NMH will maintain its Board of Directors for local control and members of the NMH Board will serve on the PRHS Board. We understand that this transfer will not result in any change to the location of use, materials, persons using licensed material, or persons responsible for radiation safety at the licensed facility. We further understand that NMH will retain its name following the transfer.

Based on the above understandings and as more fully detailed in the enclosed NRC staff's Safety Evaluation Report, which documents the NRC staff's safety review of the request, in accordance with 10 CFR 30.34, the NRC consents to the transfer. It is our understanding that, after NRC written consent, all licensed activities will be subject to the terms of the Definitive Agreement. Please notify the NRC, in writing, if this planned transfer did not occur within 30 days of the date of this letter, or this consent may be deemed null and void. If you have any questions regarding this letter, please contact Robin Elliott at (610) 337-5076 or via electronic mail at [robin.elliott@nrc.gov](mailto:robin.elliott@nrc.gov).

Future changes in the license's name, licensed use, licensed materials, licensed locations, or persons responsible for licensed material require submission of a request to amend the license. NRC approval must be received prior to implementation of the proposed change.

An environmental assessment for this action was not required because this action is categorically excluded under 10 CFR 51.22(c)(21).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation in this matter.

Sincerely,

Robin Elliott, Health Physicist
