Interrogatory No. 1

How many nonconformance reports relate to safety-related welding infractions at Limerick?

Answer

Applicant has identified twenty-six Nonconformance Reports which deal with NRC safety-related welding and welding procedure infractions.

Participants in Preparation of Answer

J. S. Kemper, Vice President, Engineering & Research
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

J. M. Corcoran
Quality Assurance
Field Branch Head
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

D. T. Clohecy
Quality Assurance - Engineer
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

Interrogatory No. 1a

Provide individual copies of those reports.

Answer

Copies of the twenty-six Nonconformance Reports have been made available previously for inspection and copying (Discovery 15, Item 1). This information had been previously provided under Discovery 2, Enclosure 2, Items 1, 2, and 3 and was updated as indicated in Applicant's answer to Interrogatory 1 of Discovery 15. Further updates of certain of these Nonconformance Reports are available for inspection and copying (Discovery 19, Item 1a).

Participants in Preparation of Answer

J. S. Kemper, Vice President, Engineering & Research
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

J. M. Corcoran
Quality Assurance
Field Branch Head
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

D. T. Clohecy
Quality Assurance - Engineer
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

Interrogatory No. 1b

Provide documentation on how those individual NCR's were dispositioned.

Answer

The disposition of each Nonconformance Report identified in the preceding answer and the reason for its particular disposition, is documented on the Nonconformance Report under Block Numbers 20 and 22.

Participants in Preparation of Answer

J. S. Kemper, Vice President, Engineering & Research
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

D. T. Clohecy
Quality Assurance - Engineer
Philadelphia Electric Company
2301 Market Street
Philadelphia, PA 19101

Interrogatory No. 2

Regarding Attachment 1 in July 3, 1980 letter from P.E.'s John S. Kemper to Mr. Boyce Grier, regarding USNRC IE Region 1 letter dated June 4, 1980 regarding 50-352-353-80-02 involving obsolete drawings (C-1182 Revision 5 and C-1183 Revision 10) how much work was done using those obsolete drawings? Show all inspection reports of work performed using those obsolete drawings, with sworn statements that all inspections were made and status of deficiencies found.

Answer

There is no indication that any work was performed using these obsolete drawings. Page 4 of IE Inspection Report 50-352-353-80-02 further describes the circumstances surrounding the drawings left on the platform:

The inspector during a tour, observed that several drawings were on a platform next to two iron workers erecting portions of a platform in Unit 1 reactor building at elevation 300 feet.

The inspector asked the iron workers if they were using the drawings for erecting the platform. They stated that the drawings did not belong to them and they were not using them..."

It was determined that the drawings belong to the iron workers' foreman and that the designated

area had received updated drawings of C-1182 and C-1183."

There is no indication that inspections were performed using these obsolete drawings. Quality Control Inspection Records C-1179-C-63-7 and C-1179-W-4, for erection of the Unit 1 Reactor Building Platforms at approximately 300 feet, reference the correct revision of the parent drawing. These QCIR's are available for inspection and copying (Discovery 19, Item 2).

Interrogatory No. 3

Re: IE Notice 82-34 regarding "welds in Main Control Panels", has the Applicant received a report on the NRC Staff review of IE Notice 82-34? If so, please provide copy.

Answer

Applicant has not received a report on the NRC Staff review of IE Notice 82-34. Applicant has received IE Information Notice 82-34 and Revision 1 of IE Information Notice 82-34 wherein it is stated, "The potential safety significance of this problem is still under review by the Nuclear Regulatory Commission (NRC) staff."
