ATTN: Mr. J. F. Stolz, Chief  
Operating Reactors Branch #4  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

SUBJECT: Arkansas Nuclear One - Unit 1  
Docket No. 50-313  
License No. DPR-51  
Reactor Coolant Pump Trip Submittal -  
Response to Generic Letter 83-10f

Gentlemen:

By our previous letter dated August 1, 1983 (1CAN088301), AP&L submitted the plan and schedule for resolving the Reactor Coolant Pump Trip issue (NUREG-0737, Item II.K.3.5). At that time, we indicated a submittal could be made by the beginning of 1984 based on the schedule for receiving the analytical portion of the work from B&W by December. It is now apparent that the B&W report will not become available until January. In addition, we will require additional time to prepare the plant specific portion of the submittal. Therefore, based on the most recent B&W estimates for completion of their analysis, we plan to make our final submittal by March 31, 1984.

We believe our request is consistent with recent informal discussions regarding schedule between the NRC and the B&W Owners Group.

Very truly yours,

John R. Marshall  
Manager, Licensing
