Attn: John F. Stolz, Chief  
Operating Reactors Branch No. 4  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Sir:

Three Mile Island Nuclear Station, Unit I (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
TMI-1 Steam Generator Repair Review

Enclosed is Supplement 2 to the report of the Third Party Review of the TMI-1 Steam Generator Repair Program. This supplement was prepared to document group member's reviews of the changes between Revision 2 and Revision 3 of GPUN's Topical Report 008. It provides written confirmation of the TPR's earlier oral statement that the revision did not affect its conclusion that "the TMI-1 plant can be operated safely with the repaired steam generators".

Sincerely

H.D. Hukill  
Vice President - TMI-1

Dear Mr. Wilson:

Attached is Supplement 2 to the supplementary Report of the Third Party Review of the TMI-1 Steam Generator Repair Program.

This Review was requested originally by your letter of April 12, 1982 and has been conducted in accordance with the Charter you provided. Previous reports were issued on September 27, 1982, February 18, 1983, and May 16, 1983.

In GPU Nuclear letters of August 22 and September 9, 1983, Mr. Wetmore provided a revision to the Safety Evaluation Report (SER) and requested review of the SER and related documents by the Third Party Review Group.

The revision of the SER concerned design analysis. Therefore, a review was performed by the Review Group members with competence in this specialty. They completed their review and discussed their results with the Chairman. The review conclusions are provided in Supplement 2.

I provided the conclusion of the Review Group to Mr. Wetmore in a telephone conversation on October 6, 1983. I want to assure you that the lateness of this written report reflects only my new priorities, not any difficulties with the SER or with the timely cooperation of the other reviewers.

Sincerely,

  
E. J. Wagner

EJW/kf
