This letter is in response to I.E. Bulletin 83-06 concerning nonconforming materials supplied by Tube-Line Corporation Facilities at Long Island, New York; Houston, Texas; and Carol Stream, Illinois.

A review of purchasing documentation and subsequent investigation of suppliers and subvendors, determined that CG&E did not receive any Tube-Line material for use in safety related systems at Zimmer Nuclear Power Station. I.E. Bulletin 83-06 is therefore not applicable to this facility.

In accord with your request to provide the following information, we advise that approximately 15 hours were expended in the review and preparation of this response. There was no radiation exposure associated with the investigation.
