

Annual Operating Report 1983
AGN 201 N Reactor No. 107
University of Utah
License R-25
Docket #50-72

A. Facility Modification: None

B. Results of Tests and Inspections:

The AGN has remained in a shutdown condition during the the entire reporting period. Therefore, tests and inspections are not required according to Tech. Spec. Sec. 4.0. However, tests concerning the Reactor Structure (Sec. 4.3) and Radiation Monitoring (Sec. 4.4) were continued as recommended by the Reactor Safety Committee. These inspections revealed no water leakage, no excessive corrosion, and no unusual radiation.

C. Corrective Maintenance: None

D. Energy Produced: None

E. Unscheduled Shutdowns: None

F. Reactor Safety Committee Action:

1. Personnel radiation exposures and radiation surveys were reviewed and approved.

G. Summary of Changes (10 CFR 50.59): None

H. Reportable Occurrences: None
