JOHN S. KEMPER  
VICE-PRESIDENT  
ENGINEERING AND RESEARCH

April 11, 1984

Mr. A. Schwencer, Chief  
Licensing Branch No. 2  
U. S. Nuclear Regulatory Commission  
Washington, DC 20555

Subject: Limerick Generating Station  
Request for Low Power Authorization (L.P.A.)

File: GOVT 1-1 (NRC)

Dear Mr. Schwencer:

You have requested Philadelphia Electric Company to inform you of our plans for applying for an authorization for a fuel loading and low power testing license for Limerick.

Under our present estimates, we still anticipate that fuel can be loaded sometime in August. The major task remaining is to complete pre-operational testing and the necessary documentation of such work, as well as the completion of technical specifications and operational manuals.

We have scheduled a full-scale technical review of the status of this work for April 26, 1984, at which time we will have a more accurate picture of our schedule. Since we presently feel that our progress is such that the filing of a motion for a low power license for fuel loading and for pre-operational testing up to five percent of rated power is necessary, we currently plan to file the motion shortly after this meeting.

Sincerely,

*John S. Kemper*
