Subject: Withdrawal of Proposed Change No. 126 to Technical Specifications  
Intermittent Operation of the Hydrogen/Oxygen Analyzers  
Cooper Nuclear Station, Docket No. 50-298, DPR-46

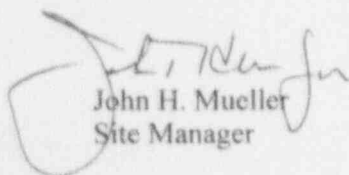

- References:
- 1) Letter (No. NSD940428) to the U.S. Nuclear Regulatory Commission Document Control Desk from Nebraska Public Power District dated April 26, 1994, "Proposed Change No. 126 to Technical Specifications; Intermittent Operation of Hydrogen/Oxygen Analyzers"
  - 2) Letter to the Nebraska Public Power District from James R. Hall (U.S. NRC) dated April 3, 1995, "Request for Additional Information (RAI) on the Application for Proposed Change No. 126 to Technical Specifications (TAC No. M91345)"

Gentlemen:

On April 26, 1994, the Nebraska Public Power District (District) submitted to the Nuclear Regulatory Commission (NRC) Proposed Change No. 126 to the Cooper Nuclear Station (CNS) Technical Specifications. On April 3, 1995, the NRC forwarded to the District a Request for Additional Information (RAI) regarding the subject proposed change. The District has reevaluated Proposed Change No. 126 and determined that the change, as proposed, does not fully address all the issues associated with the hydrogen/oxygen analyzers. Therefore, the District requests that Proposed Change No. 126 be withdrawn from NRC consideration. The District is reevaluating this issue and may submit a new proposed change to address the hydrogen/oxygen concentration analyzer issue.

If you have any questions, please contact this office.

Sincerely,

John H. Mueller
