Dear Mr. Schwencer:

Enclosed for your information are the reports on the Archaeological investigation of the 220-60 and 220-61 transmission lines. Also enclosed are the letters which transmitted these reports to the Bureau of Historic Preservation and the Pennsylvania Historic and Museum Commission.

Sincerely

E. J. Bradley

Ms. Donna Williams, Chief
Division of Planning & Protection
Bureau of Historic Preservation
Box 1026
Harrisburg, Pa. 17120

SUBJECT: Archaeological Survey, Transmission Lines Associated
With Limerick Generating Station

Dear Ms. Williams:

Enclosed for your review are reports prepared by John Milner Associates regarding the Archaeological investigation of the 220-60 and 220-61 transmission lines associated with Limerick Generating Station. Having been deeply involved with the archaeological work on these lines since September, 1982, I feel confident that all prehistoric cultural resources have been properly dealt with and that the subject reports will meet with your approval.

You will note that elements such as settlement patterning, site function, lithic material distribution etc. are not for the most part, addressed in the reports. It was felt that such interpretations, and others, could be dealt with in a much more thorough manner when research, field, laboratory and informant data from all four transmission lines are available and assimilated. A detailed analysis of all such data will then be made and a separate archaeological report will be prepared which will present a Middle Schuylkill River Valley cultural synthesis.

Copies of the enclosed reports, containing original photographs, have been forwarded to Mr. B. Kent, State Archaeologist, for permanent filing following his review of same.

I would like to thank you, once again, for your full cooperation throughout this project. Please feel free to contact me regarding any questions you might have with respect to the enclosed reports or other aspects of the investigation.

Yours very truly,

W. C. Payne

REAL ESTATE DEPARTMENT

March 28, 1984

Mr. Barry Kent, State Archaeologist
Pa. Historic & Museum Commission
William Penn Memorial Museum
P.O. Box 1026
Harrisburg, Pa. 17120

SUBJECT: Archaeological Survey, Transmission Lines Associated with Limerick
Generating Station

Dear Barry:

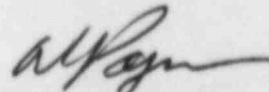

Enclosed for your review are reports, containing original photographs, prepared by John Milner Associates regarding the archaeological investigation of the 220-60 and 220-61 transmission lines associated with Limerick Generating Station.

As agreed upon at our meeting in your office on February 7, 1984, elements such as settlement patterning, site function, lithic material distribution etc. are not, for the most part, addressed in the reports, as it was felt that such interpretations, and others, could best be dealt with when data from all four transmission lines are available and assimilated. A detailed analysis will then be made and a separate archaeological report will be prepared which will present a Middle Schuylkill River Valley cultural synthesis.

Copies of the enclosed reports have also been forwarded to Ms. Donna Williams for her review.

I would like to thank you, once again, for your full cooperation throughout the course of this project. Should you have any questions regarding the reports or any other aspects of the survey, please feel free to contact me.

Yours very truly,

W. C. Payne
