Dr. Thomas E. Murley  
Region I, Regional Administrator  
U. S. Nuclear Regulatory Commission  
631 Park Avenue  
King of Prussia, PA. 19406

Dear Dr. Murley:

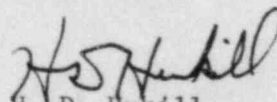

Three Mile Island Nuclear Station, Unit I, (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
Semi-Annual Radioactive Effluent and Release Report Submittal Delay

TMI-1 Technical Specifications Section 6.9.5.1 requires that the Semi-Annual Radioactive Effluent Release for the period July 1 through December 31, be submitted within 60 days, or by February 28th of each year.

As communicated to our resident inspector on February 28, 1984, the TMI-1 Semi-Annual Report due on this date was not finalized for submittal and a two-week filing extension was requested. Due to our contract vendor experiencing continued computer down-time, our Fourth Quarter Individual Dose accumulation calculations were not processed to include in the report. On March 13, 1984, we were advised that the Fourth Quarter Individual Dose Accumulation data was still not available, and again notified the resident. He contacted Walt Pasciak, Region I, and they recommended that we submit the information we had to date and send the outstanding data as soon as it was received.

While attempting to submit this report there were several changes noted which needed management concurrence before finalization, and at this date the report is still being reviewed. As soon as all information is completed and reviewed this report will be provided.

Sincerely,

  
H. D. Hukill,  
Director, TMI-1
