EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 | At 2015 while in Mode 3, personnel exiting the containment determined

0 3 | that the inner door would close but not latch thereby preventing the

0 4 | outer door from opening (T.S. 3.6.1.3.a). The interlock was repaired,

0 5 | tested and returned to service at 2215. The outer door remained shut and

0 6 | latched at all times throughout the event.

0 7 | Similar events: 81-12; 50-317/81-25.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 | Airlock mechanism failed due to a broken Cam Follower. An overhaul has
1 1 | been performed which includes manufacturer's recommendations for replac-
1 2 | ing operating mechanism parts with higher strength replacements. Also,
1 3 | the forces acting upon the new parts will be less due to the limited
1 4 | free play in the door's mechanism. No further action is required.
