MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

License Amendment Request Dated January 31, 1994  
Main Steam Isolation Valve Leak Test Requirements

By letter dated January 31, 1994, we requested an amendment to the Technical Specifications Appendix A of the Operating License for the Monticello Nuclear Generating Plant. This amendment was to increase the main steam isolation valve Appendix J leak rate test pressure and associated allowable leakage.

By issuance of this letter, we are withdrawing that submittal, as it is our intent to resubmit this change along with some additional associated changes. We believe one comprehensive change is to the mutual benefit of both the NRC and NSP. This new submittal should be forthcoming in the next three months.

Please contact Sam Shirey, Sr. Licensing Engineer, (612-295-1449) if you require further information related to this issue.
