

THE CINCINNATI GAS & ELECTRIC COMPANY

February 23, 1983

Mr. Darrell G. Eisenhut
Director, Division of Licensing
Office of Nuclear Reactor Regulation
US NRC
Room 528-A
Philadelphia Building
Washington, D.C. 20555

Dear Mr. Eisenhut:

Projected dates for conducting operator licensing examination site visits are provided as requested by NRC Generic Letter No. 83-01. It is most likely that two visits will be requested, one for March/April 1984 and another one for March/April 1985. Examinations for eight to ten candidates would be requested for each visit.

The dates and number of candidates are tentative at this time and should be treated appropriately.

Very truly yours,

THE CINCINNATI GAS & ELECTRIC COMPANY

K. K. Chitkara
