Mr. Donald J. Skovholt
Assistant Director for Reactor Operations
Division of Reactor Licensing
United States Atomic Energy Commission
Washington, D. C. 20545

Dear Mr. Skovholt:

50-218

Your letter dated April 11, 1972 requested information on the baffles and other structural components in the Oyster Creek suppression pool. We are presently planning to inspect the baffles and other structures near the relief valve blowdown lines shortly after shutting the plant down for refueling. Based on the results of this inspection and of analyses being performed by the General Electric Company, we will formulate a course of action aimed at avoiding safety problems.

Assuming timely approval by our safety committees, we expect to submit the requested information to you by May 22, 1972.

Very truly yours,

Ivan R. Finfrock, Jr.

Ivan R. Finfrock, Jr.
Manager, Nuclear Generating Stations
