Docket Nos. 50-348  
50-364

Director, Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Mr. S. A. Varga

Farley Nuclear Plant - Units 1 and 2  
Emergency Response Capability (ERC)  
Integrated Implementation Plan and Schedule

Gentlemen:

By letters dated December 15, 1983 and April 6, 1984, Alabama Power Company committed to provide the NRC an update to the Farley ERC Integrated Implementation Plan and Schedule during September 1984. Alabama Power Company has determined that this update could more accurately refine schedule milestones and provide a greater level of detail for scheduled activities if prepared coincident with the finalization of the Plant Change Notice (PCN) Packaging for the Farley Nuclear Plant Unit 2 Third Refueling Outage. Finalization of the PCN Packaging is scheduled for November 1984 and is defined by the following:

- all outage design finalized and reviewed,
- all outage work requests written,
- all outage work planning complete,
- all work fully integrated into the outage schedule, and
- all materials for outage work onsite.

Preparation of the Farley ERC Integrated Implementation Plan and Schedule coincident with the finalization of the PCN Packaging enables incorporation of the details of the NUREG-0737, Supplement 1 outage activities that would not be available during September 1984. This change in submittal date would allow a higher degree of confidence in the refined schedule due to the PCN Packaging completion.

Alabama Power Company therefore requests that the update submittal be deferred until November 1984.

If there are any questions, please advise.

Yours very truly,

  
F. L. Clayton, Jr.
