Division of Licensing  
Nuclear Regulatory Commission  
7920 Norfolk Avenue  
Bethesda, Maryland 20814

Subject: Detroit Edison Company  
Enrico Fermi Unit 2  
Independent Design Verification Program  
Notice of Scheduled Meeting

Dear Mr. Lynch:

In accordance with the protocol requirements established for the Detroit Edison IDVP on Fermi-2, be advised that Cygna Energy Services has requested a meeting for April 30, 1984 at Sargent & Lundy offices beginning at 8:30 a.m. The purpose of the meeting is to kick off the structural review activities needed to prepare responses to Enclosure 3 items in the NRC letter stamped March 26, 1984. The meeting should identify what documents will be needed to complete the review, as well as any additional design information to prepare the responses to the NRC and Detroit Edison. Presently, Cygna anticipates the weeks of April 30, and May 7, 1984 will, for the most part, be spent at Sargent & Lundy's offices reviewing the requested documents and gathering the required information.

Please contact me if you have any questions or comments on this written notice of a scheduled meeting. This letter satisfies Item 5 of the protocol contained in Enclosure 5 of the NRC letter dated March 26, 1984.

Very truly yours,

David A. Ferg  
Project Manager
