ILLINOIS POWER COMPANY

CLINTON POWER STATION, P.O. BOX 678, CLINTON, ILLINOIS 61727

April 19, 1984

Docket No. 50-461

Director of Nuclear Reactor Regulation
Attention: Mr. A. Schwencer, Chief
Licensing Branch No. 2
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Subject: Clinton Power Station Unit 1
Control Room Design Review (CRDR)
SER Confirmatory Issue #38, NUREG-0853

Dear Mr. Schwencer:

In letter U-0647, dated July 5, 1983, Illinois Power sent to the NRC our schedule for activities associated with the Emergency Response Capability Implementation Plan. The purpose of this letter is to provide the status and schedule for resolution of the Preliminary Design Assessment (PDA) human engineering deficiencies resulting from the NRC CRDR/Audit conducted in November 1981.

The evaluation of the PDA human engineering deficiencies is currently underway and is scheduled to be completed in July 1984. A report of the results of this evaluation will be submitted to the NRC in September 1984. Implementation of the resolutions that correct the human engineering deficiencies will be completed in early 1985.

We believe that this schedule is responsive to your needs. Please advise us if this is not the case.

Sincerely yours,

Daniel I. Herborn
Director, Nuclear Licensing
and Configuration
Nuclear Station Engineering
