Ladies/Gentlemen:

DOCKETS 50-266 AND 50-301
ADDENDUM TO TECHNICAL SPECIFICATIONS CHANGE REQUEST 176
ADMINISTRATIVE CHANGES
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

On January 24, 1995, we submitted Technical Specifications Change Request 176, "Administrative Changes." The proposed changes modified Technical Specifications Section 15.6.5, "Review and Audit," and Section 15.7.8, "Administrative Controls," by removing Quality Assurance audit frequencies, removing Section 15.6.5.4, "Emergency Plan Reviews," and extending the radioactive effluent reporting period from semiannual to annual. Included in this submittal was the removal of fire protection program audit frequencies. On February 24, 1995, we modified our request due to comments by NRC staff and made several administrative changes.

Upon review of our Technical Specifications, we identified an additional reference to the Semiannual Monitoring Report that should have been included in our original submittal and changed to "Annual" Monitoring Report. Therefore, a marked-up Technical Specifications page is enclosed with the appropriate revision.

We have reviewed the No Significant Hazards Consideration and Safety Evaluation forwarded to you in our January 24, 1995, submittal. Because the enclosed revision does not increase the scope or change the intent of the original submittal, we believe the conclusions contained therein remain valid.

Please contact us if you have any questions.

Sincerely,

Bob Link
Vice President
