

UNITED STATES OF AMERICA
NUCLEAR REGULATORY COMMISSION

Application of SOUTHERN CALIFORNIA EDISON)
COMPANY, ET AL. for a Class 103 License) Docket No. 50-361
to Acquire, Possess, and Use a Utilization)
Facility as Part of Unit No. 2 of the) Amendment Application
San Onofre Nuclear Generating Station) No. 26

SOUTHERN CALIFORNIA EDISON COMPANY, ET AL. pursuant to 10 CFR 50.90,
hereby submit Amendment Application No. 26.

This amendment application consists of the following proposed changes to
Facility Operating License NPF-10:

Proposed Change NPF-10-8 is a request to revise Technical
Specification 3/4.6.3, CONTAINMENT ISOLATION VALVES, to clarify determination
of valve operability and the Actions to be taken should a valve become
inoperable.

Proposed Change NPF-10-108 is a request to revise Technical Specification
Table 3.8-1, CONTAINMENT PENETRATION CONDUCTOR OVERCURRENT PROTECTIVE DEVICES,
to correct equipment designations.

Proposed Change NPF-10-111 is a request to revise Technical
Specification 3/4.11.2, Table 4.11-2, RADIOACTIVE GASEOUS WASTE SAMPLING AND
ANALYSIS PROGRAM and to add a new Technical Specification 3.11.2.7,
RADIOACTIVE EFFLUENTS, AUXILIARY BOILER, in order to facilitate an exemption

to 10 CFR 20.305 via Technical Specification changes to allow disposal of radioactively contaminated Reactor Coolant Pump (RCP) motor oil, turbine building sump, and other waste oil by incineration.

Proposed Change NPF-10-114 is a request to revise Technical Specification 4.6.1.6, CONTAINMENT TENDONS. The proposed change clarifies the containment tendon surveillance requirements to be consistent with the current surveillance program and to reduce surveillance requirements based on anchorage accessibility.

Proposed Change NPF-10-119 is a request to revise Technical Specification Bases 3/4.2.3, AZIMUTHAL POWER TILT-Tq, to correctly indicate that COLSS calculates azimuthal power tilt based on its input from the fixed incore detectors and has no connection with the CPC's.

Proposed Change NPF-10-123 is a request to revise Technical Specification 2.0 Bases, DNBR-LOW, to clarify and make editorial changes.

Proposed Change NPF-10-125 is a request to revise Technical Specification 3/4.6.2.2, IODINE REMOVAL SYSTEM, to correct wording regarding spray chemical solution temperature requirements. Additionally, the proposed change provides percent tank levels which correspond to the minimum required usable spray chemical solution volume.

Proposed Change NPF-10-127 is a request to add Technical Specification 3/4.7.10, "EMERGENCY CHILLED WATER SYSTEM" (ECWS), to delineate the Limiting Condition for Operation requirements and surveillance requirements for the ECWS.

Proposed Change NPF-10-130 is a request to delete License Condition 2.C(4), CONTAINMENT TENDON SURVEILLANCE since submittal of the currently implemented containment tendon surveillance program meets the intent of the license condition.

Proposed Change NPF-10-134 is a request to revise Technical Specification 2.2.2, Table 2.2-2, CORE PROTECTION CALCULATOR ADDRESSABLE CONSTANTS, to allow changes to the value of the addressable flow calibration constant, FC2, without approval of the Onsite Review Committee (OSRC).

Proposed Change NPF-10-135 is a request to revise Technical Specification Table 3.3-4, ENGINEERED SAFETY FEATURES ACTUATION SYSTEM INSTRUMENTATION TRIP VALUES, to modify the setpoints for the Control Room Toxic Gas Isolation System (TGIS).

Proposed Change NPF-10-138 is a request to revise Technical Specifications 3.1.3.1, CEA POSITION, 3.1.3.6, REGULATING CEA INSERTION LIMITS, and 3.1.3.7, PART LENGTH CEA INSERTION LIMITS, to reduce the sensitivity of the Core Protection Calculators and Control Element Assembly Calculators to electrical noise.

Proposed Change NPF-10-155 is a request to add a new Technical Specification Section 3/4.4.10, REACTOR COOLANT GAS VENT SYSTEM. This proposed change satisfies the Generic Letter 83-37 requirement for Technical Specifications for reactor coolant system vents.

Pursuant to 10 CFR 170.22, the following determinations have been made and the corresponding fees are remitted:

Proposed Change NPF-10-8 is considered to constitute a class III amendment on the basis that the change has safety significance. The fee of \$4,000.00 corresponding to this determination was remitted with Southern California Edison Company's letter dated March 30, 1984.

Proposed Change NPF-10-108 is considered to constitute a Class II amendment in that it is essentially editorial in nature. The fee of \$1,200.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-111 is considered to constitute a Class III amendment on the basis that the change involves environmental issues. The fee of \$4,000.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-114 is considered to constitute a Class III amendment on the basis that the change has safety significance. The fee of \$4,000.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-119 is considered to constitute a Class II amendment in that it is essentially editorial in nature. The fee of \$1,200.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-123 is considered to constitute a Class II amendment in that it is essentially editorial in nature. The fee of \$1,200.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-125 is considered to constitute a Class II amendment in that it is essentially editorial in nature. The fee of \$1,200.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-127 is considered to constitute a Class III amendment on the basis that the change has safety significance. The fee of \$4,000.00 corresponding to this determination was remitted with Southern California Edison Company's letter dated April 24, 1984.

Proposed Change NPF-10-130 is considered to constitute a Class III amendment in that the change has safety significance. The fee of \$4,000.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-134 is considered to constitute a Class II amendment on the basis that the change is administrative in nature. The fee of \$1,200.00 corresponding to this determination is enclosed.

Proposed Change NPF-10-135 is considered to constitute a Class III amendment on the basis that the change has safety significance. The fee of \$4,000.00 corresponding to this determination was remitted with Southern California Edison Company's letter dated April 6, 1984.

Proposed Change NPF-10-138 is considered to constitute a Class III amendment on the basis that the change has safety significance. The fee of \$4,000.00 corresponding to the determination was remitted with Southern California Edison Company's letter dated April 10, 1984.

Proposed Change NPF-10-155 is considered to constitute a Class II amendment on the basis that the change has safety significance. A fee of \$4,000.00 corresponds to this determination. No fee is required to be remitted because this change responds to an NRC request.

NUCLEAR REGULATORY COMMISSION

Application of SOUTHERN CALIFORNIA EDISON)
COMPANY, ET AL. for a Class 103 License) Docket No. 50-362
to Acquire, Possess, and Use a Utilization)
Facility as Part of Unit No. 3 of the) Amendment Application
San Onofre Nuclear Generating Station) No. 12

SOUTHERN CALIFORNIA EDISON COMPANY, ET AL. pursuant to 10 CFR 50.90,
hereby submit Amendment Application No. 12.

This amendment application consists of the following proposed changes to
Facility Operating License NPF-15:

Proposed Change NPF-15-8 is a request to revise Technical
Specification 3/4.6.3, CONTAINMENT ISOLATION VALVES, to clarify determination
of valve operability and the Actions to be taken should a valve become
inoperable.

Proposed Change NPF-15-108 is a request to revise Technical Specification
Table 3.8-1, CONTAINMENT PENETRATION CONDUCTOR OVERCURRENT PROTECTIVE DEVICES,
to correct equipment designations.

Proposed Change NPF-15-111 is a request to revise Technical
Specification 3/4.11.2, Table 4.11-2, RADIOACTIVE GASEOUS WASTE SAMPLING AND
ANALYSIS PROGRAM and to add a new Technical Specification 3.11.2.7,
RADIOACTIVE EFFLUENTS, AUXILIARY BOILER, in order to facilitate an exemption

to 10 CFR 20.305 via Technical Specification change to allow disposal of radioactively contaminated Reactor Coolant Pump (RCP) motor oil, turbine building sump, and other waste oil by incineration.

Proposed Change NPF-15-114 is a request to revise Technical Specification 4.6.1.6, CONTAINMENT TENDONS. The proposed change clarifies the containment tendon surveillance requirements to be consistent with the current surveillance program and to reduce surveillance requirements based on anchorage accessibility.

Proposed Change NPF-15-119 is a request to revise Technical Specification Bases 3/4.2.3, AZIMUTHAL POWER TILT-Tq, to correctly indicate that COLSS calculates azimuthal power tilt based on its input from the fixed incore detectors and has no connection with the CPC's.

Proposed Change NPF-15-123 is a request to revise Technical Specification 2.0 Bases, DNBR-LOW, to clarify and make editorial changes.

Proposed Change NPF-15-125 is a request to revise Technical Specification 3/4.6.2.2, IODINE REMOVAL SYSTEM, to correct wording regarding spray chemical solution temperature requirements. Additionally, the proposed change provides percent tank levels which correspond to the minimum required usable spray chemical solution volume.

Proposed Change NPF-15-127 is a request to add Technical Specification 3/4.7.10, "EMERGENCY CHILLED WATER SYSTEM" (ECWS), to delineate the Limiting Condition for Operation requirements and surveillance requirements for the ECWS.

Proposed Change NPF-15-130 is a request to delete License Condition 2.C(4), CONTAINMENT TENDON SURVEILLANCE since submittal of the currently implemented containment tendon surveillance program meets the intent of the license condition.

Proposed Change NPF-15-134 is a request to revise Technical Specification 2.2.2, Table 2.2-2, CORE PROTECTION CALCULATOR ADDRESSABLE CONSTANTS, to allow changes to the value of the addressable flow calibration constant, FC2, without approval of the Onsite Review Committee (OSRC).

Proposed Change NPF-15-135 is a request to revise Technical Specification Table 3.3-4, ENGINEERED SAFETY FEATURES ACTUATION SYSTEM INSTRUMENTATION TRIP VALUES, to modify the setpoints for the Control Room Toxic Gas Isolation System (TGIS).

Proposed Change NPF-15-138 is a request to revise Technical Specifications 3.1.3.1, CEA POSITION, 3.1.3.6, REGULATING CEA INSERTION LIMITS, and 3.1.3.7, PART LENGTH CEA INSERTION LIMITS, to reduce the sensitivity of the Core Protection Calculators and Control Element Assembly Calculators to electrical noise.

Proposed Change NPF-15-155 is a request to add a new Technical Specification Section 3/4.4.10, REACTOR COOLANT GAS VENT SYSTEM. This proposed change satisfies the Generic Letter 83-37 requirements for Technical Specifications for Reactor Coolant System Vents.

Pursuant to 10 CFR 170.22, each of the Proposed Changes contained in Amendment Application No. 12 is considered to constitute a Class I amendment. The basis for this determination is that the Proposed Changes contained in Amendment Application No. 12 are duplicates of those contained in Amendment Application No. 26 to Operating License NPF-10 for San Onofre Nuclear Generating Station, Unit 2. Based on this determination, a Class I fee of \$400.00 is required for each of the Proposed Changes in Amendment Application No. 12. The fee of \$400.00 for Proposed Change NPF-15-8 was remitted with Southern California Edison Company's letter dated March 30, 1984. The fee of \$400.00 for Proposed Change NPF-15-127 was remitted with Southern California Edison Company's letter dated April 24, 1984. The fee of \$400.00 for Proposed Change NPF-15-155 is not required to be remitted because this change responds to an NRC request. The remaining fees totalling \$4,000.00 are enclosed.
