William J. Dircks  
Asst. Executive Director for Operations  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Dircks:

Thank you very much for responding to my letter on leaks at the Nuclear facility on Turkey Point in Florida. I am well assured that the leakage should not harm us.

However, in reading your letter, I still find one question unanswered. First of all, when will the repair of weld defects in the liners be completed? And second, will that end the problem?

Thank you very much for your time and trouble.

Sincerely yours,

*E. Shipe*
