Director of Nuclear Reactor Regulation
Attention: Ms. E. Adensam, Chief
Licensing Branch No. 4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Ms. Adensam:

In the Matter of) Docket Nos. 50-328
Tennessee Valley Authority)

Operating license condition 2.F for unit 2 of our Sequoyah Nuclear Plant reads as follows:

TVA will provide a report prepared by the Kaman Sciences Corporation (KSC) on a full scale nuclear safety and availability analysis within six months from the date of the KSC report.

As stated in my March 22, 1983 letter to you, KSC has been replaced by Pickard, Lowe, and Garrick, by the Electric Power Research Institute (EPRI), to perform the nuclear safety and availability analysis for the Sequoyah Nuclear Plant.

This study is almost complete. However, EPRI has incurred a delay in the publication of the final report. The final report is now expected to be published in June 1984 with a subsequent submittal of a report by TVA in December 1984.

If you have any questions concerning this matter, please get in touch with Jerry Wills at FTS 858-2683.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills
L. M. Mills, Manager
Nuclear Licensing

Sworn to and subscribed before me
this 1st day of May 1984
