Dear Mr. O'Reilly:

SEQUOYAH NUCLEAR PLANT UNITS 1 AND 2 - NRC-OIE REGION II INSPECTION REPORT
50-327/83-13 AND 50-328/83-13

The following information concerns OIE inspection report Nos. 50-327/83-13 and 50-328/83-13 and the TVA response submitted to you from D. S. Kammer on October 14, 1983. TVA's response to deficiency 327,328/83-13-08 committed TVA to revise the Sequoyah emergency monitoring implementing procedures and the Muscle Shoals Emergency Center emergency monitoring implementing procedures by January 31, 1984. We provided a revised completion date of March 30, 1984 on January 31, 1984.

As we have previously reported, we are revising the Browns Ferry and Watts Bar procedures in order to maintain consistency with TVA's other nuclear plants. We have been unable to coordinate a consistent set of implementing procedures for all TVA's plants to date, and we will require additional time to incorporate all plant suggestions and changes. Our revised expected completion date is May 1, 1984.

If you have any questions, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
