ATTENTION: T. R. QUAY

SUBJECT: AP600 DRAFT SAFETY EVALUATION REPORT - OPEN ITEM STATUS
REPORT

Dear Mr. Quay:

Enclosed is a report providing the current Westinghouse status of open items contained in the November 1994 Draft Safety Evaluation Report (DSER) on the AP600. This report is in response to a Westinghouse commitment to respond to all DSER open items by May 31, 1995.

The report reflects progress toward closure on all DSER open items, DSER confirmatory items, and DSER COL items. This progress has been obtained through docketed AP600 submittals and through numerous Westinghouse/NRC staff interactions. These interactions are ongoing and will continue as necessary to bring all open items to full closure by September 30, 1995 per the July 14, 1994 expedited review schedule.

Westinghouse requests that the NRC staff review the enclosed report and provide feedback by June 12, 1995 so that the AP600 open item database can be updated before the next Senior Management Meeting.
