NPF-7

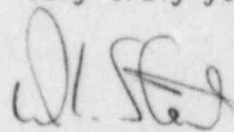

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 & 2
NUREG-0737, ITEM II.D.1
PERFORMANCE TESTING OF RELIEF AND SAFETY VALVES
REQUEST FOR ADDITIONAL INFORMATION

In your letter dated February 8, 1984 you requested additional information required for completion of your review of the above subject. After having our vendor and consultant architect-engineer review your request and their schedules and work load, we have established a schedule for providing the requested information.

The schedule by which we will provide the additional information is greatly influenced by the availability of our vendor's and consultant architect-engineer's resources. Westinghouse Electric Corporation has received several other similar requests from other utilities and must allocate their resources appropriately, therefore our schedule is directly impacted. Stone and Webster Engineering Corporation has similar resource allocations to consider. Once the respective parties provide their portion of the information, we will compile and assemble it into a package and forward it to NRC following appropriate review by Vepco. Accordingly, the information requested in your letter of February 8, 1984 will be provided to you on or before September 28, 1984.

Very truly yours,

W. L. Stewart
