Region II

Attn: Mr. James P. O'Reilly, Regional Administrator
101 Marietta Street, NW, Suite 2900
Atlanta, Georgia 30303

Dear Mr. O'Reilly:

BELLEFONTE NUCLEAR PLANT UNITS 1 AND 2 - FRONT COVERS SEPARATED FROM BAILEY
METER MODULES - BLRD-50-438/83-52, BLRD-50-439/83-45 - THIRD INTERIM
REPORT

The subject deficiency was initially reported to NRC-OIE Inspector
Linda Watson on October 4, 1983 in accordance with 10 CFR 50.55(e) as NCR
2454. This was followed by our interim reports dated November 1, 1983 and
January 25, 1984. Below is our third interim report. We expect to submit
our next report by November 21, 1984. We consider 10 CFR Part 21
applicable to this deficiency.

TVA has reviewed Babcock & Wilcox's (B&W) recommended disposition and
has found that there are still concerns which must be satisfactorily
resolved before the NCR can be dispositioned. TVA will provide a final
report to the NRC upon resolution of these concerns.

If you have any questions, please get in touch with R. H. Shell at
FTS 858-2688.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
