ATTN: Mr. Peter Erickson

Dear Mr. Erickson:

My sincerest thanks for providing me with a copy of amendments to our Reactor License No. R-65, and procedures regarding decommissioning of the Peach Bottom Unit One Nuclear Reactor. A preliminary review of the decommissioning procedures reveal that they contain a great deal of useful information. It will certainly give us an indication of the problems associated with dismantling and disposing of various reactor components.

We would certainly appreciate any further information you could supply us regarding this subject, especially on a research (swimming pool) type reactor. Again, many thanks for your assistance.

Sincerely,

Donald J. Stevens
