Director of Nuclear Reactor Regulation
Attention: Mr. G.W. Knighton, Chief
Licensing Branch No. 3
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

SUBJECT: Waterford SES Unit 3
Docket No. 50-382
Detailed Control Room Design Review (DCRDR)

REFERENCE: W3P84-1005 dated April 10, 1984

Dear Sir:

In the referenced letter LP&L committed to providing the DCRDR program plan and summary report in one submittal scheduled for January 31, 1985. However, at the request of your staff, we are amending our schedule to allow for a two-fold submittal as follows:

<u>Report</u>	<u>Submittal</u> <u>Date</u>
Program Plan	October 1, 1984
Summary Report	March 1, 1985

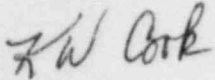

Due to this change some qualifying remarks are in order. The Program Plan will not necessarily be a listing of intended actions but rather a description of what has been completed. As you know, most DCRDR work at Waterford was completed prior to issuance of the NUREG 0737 Supplement 1 requirement for submittal of a Program Plan. Additionally, the Summary Report schedule is tentative, dependent upon the timely review by your staff of the Program Plan and the extent of comments received that must be addressed in the Summary Report.
